IMAGING ON CALL, LLC ACQUIRES NIGHTVISION RADIOLOGY, INC. EXPANDING
ITS TELERADIOLOGY COVERAGE

Poughkeepsie, NY—June 5, 2008—Imaging On Call, LLC, a U.S. based teleradiology provider and industry leader in patient care, announced that it has acquired NightVision Radiology Inc. of Mayfield Heights, OH. With the addition of NightVision, Imaging On Call (IOC) will increase its roster of physicians to 31 radiologists serving a growing and expanding base of U.S. hospitals and radiology practices.

“We are excited to partner with an organization that has built its reputation using a quality first approach. It complements the IOC strategic goal to continue to grow while providing superior patient care among hospitals and radiology practices nationwide” said Brian Phelan, CEO of Imaging On Call. “The combination of Imaging On Call and NightVision provides our customers with a broader range of coverage in all sub-specialties of radiology 24 hours a day, 7 days a week.”

The additional radiologists will allow IOC to expand coverage hours and provide customers with quality services in a timely manner. Imaging On Call has completed the acquisition of NightVision and expects to completely combine operations by July, 2008.

About Imaging On Call

Imaging On Call (www.imagingoncall.net) is a full service teleradiology provider and industry leader in patient care with a staff of over 35 employees and 31 radiologists. IOC’s Board certified, fellowship trained radiologists are skilled in all imaging modalities with specialty training in all areas. As an extension of radiology practices, IOC provides preliminary, final or subspecialty reports 24/7/365.
